Subject: ACL WORK :: UPDATED SCHEDULE

Debbie,

Thanks for taking the time to discuss the scheduling and logistics for the upcoming investigative work at Army Creek Landfill. We have the following scheduling update, as we are confirming the details and contracting of well installation, and propose the following.

Updated Work Plan Schedule

The following is a listing of the anticipated schedule to complete this work. Please note this these time periods are contingent on USEPA review, response times, and approval and driller availability. Also, monitoring events will be synchronized with the routine ACL and DS&G semi-annual monitoring events.

- Western Lobe Well Installation and Development – April – June 2019
- Quarterly Sampling Events – July 2019; October 2019 (also to include VOCS, anions and cations), January 2020; and April 2020 (also to include VOCS, anions and cations)
- PFAs Sampling Event – October 2019
- First Quarterly Event and Well Installation Report – late September 2019
- PFAS Source Evaluation Report – March

- Subsequent sampling data submitted with ACL's annual (October 2019) and semi-annual (April 2020) monitoring reports in January 2020 and July 2020, respectively.
- Final Report with Updated CSM – July 2020
- Please confirm that this proposal is acceptable, and that we can synchronize the PFAs Monitoring Event with the major semi-annual events at ACL and DS&G.

In the meantime, we are working to get you the revised ACL Work Plan next week, per your request, and are looking forward to getting your response so that we can finalize this document.

Thanks so much for your time and consideration.

Michele
